

Feasibility Analysis

A. TECHNICAL FEASIBILITY

Technical feasibility is on the basis of design of the system. Technical issues raised are that the project should be developed so that all the necessary things are covered up. The whole project is made using updated softwares.

B. ECONOMIC FEASIBILITY

This online portal is economically feasible because there is no such extra charges for using this software all you need to pay is only for your internet connection, which you would also use for your other purposes also.

C. BEHAVIORAL FEASIBILITY

This software is feasible according to its behaviour because it is will fulfil its purpose of existence and also it is very user friendly and anyone even a Layman person can use its very efficiently.
